

Adobe® Creative Suite® 5.5 K-12 School Site License

Frequently Asked Questions

What is the Adobe Creative Suite 5.5 K-12 School Site License?

Adobe is offering new Creative Suite 5.5 software—including Design Premium, Design Standard, Web Premium, Production Premium, and Master Collection—through the Adobe K-12 School Site License program. The Adobe K-12 School Site License allows a school to install select Creative Suite software on up to 250 or 500 (school-owned or school-leased) computers regardless of school enrollment size. K-12 School Site Licenses also come with DVDs that contain ready-to-use curriculums and other materials that help educators implement career and technical education programs for print, web, animation, video, and mobile projects.

Who is eligible to purchase a K-12 School Site License?

K-12 School Site Licenses are available to qualifying accredited K-12 public and nonpublic schools only, located at a single address in the United States or Canada.

How do I purchase a K-12 School Site License?

K-12 School Site Licenses can be purchased through either of two Adobe Volume Licensing programs—the Transactional Licensing Program (TLP) or the Cumulative Licensing Program (CLP). To find an Adobe Authorized Education Reseller, visit <http://partners.adobe.com/resellerfinder/na/education.jsp>. For more information about Adobe Volume Licensing for education, visit www.adobe.com/aboutadobe/volumelicensing/education.

Can my district purchase a K-12 School Site License and distribute licenses to multiple schools?

No. A district must purchase a K-12 School Site License for each school that will be using the software. K-12 School Site Licenses cannot be split up and distributed among multiple schools or school locations. For example, if a district wants to purchase Creative Suite 5.5 K-12 School Site Licenses for five schools within the district, that district must purchase five separate site licenses. The district or schools also have the option to purchase individual volume licenses through TLP or CLP from an Adobe Authorized Education Reseller.

Can I share licenses with my district office?

District offices cannot install software from a K-12 School Site License. District offices must purchase volume licenses through TLP or CLP, as they do not qualify as an accredited K-12 public or nonpublic school.

May I duplicate and distribute the curriculum DVD?

A school is welcome to duplicate and distribute the curriculum resources from the Adobe Digital Careers Teaching Resources DVD among educators within that school.

What is included with each K-12 School Site License?

Deliverables include software licenses for the respective Creative Suite 5.5 edition. When purchasing a K-12 School Site License, you also must purchase one media kit. The media kit includes the K-12 Site End-User License Agreement (EULA) and the Adobe Digital Careers Teaching Resources DVD. The media kit will be delivered via postal mail.

Can I purchase additional media kits?

Yes. Contact your Adobe Authorized Education Reseller regarding the availability of additional media kits. Note that additional kits come with the Adobe Digital Careers Teaching Resources DVD only.

Can I purchase a single K-12 School Site License through the online Adobe Store?

No. K-12 School Site Licenses are available only through Adobe Volume Licensing and must be purchased through an Adobe Authorized Education Reseller.

Can a higher education institution (college or university) purchase a K-12 School Site License?

No. K-12 School Site Licenses are available only to K-12 schools and districts purchasing on behalf of schools.

Can Creative Suite 5.5 editions be split up to allow individual components to be installed on multiple computers?

No. A K-12 School Site License for a CS5.5 edition can be installed only on a total of 250 or 500 computers, depending on the license purchased. For example, installing one component from the software on 500 computers and another component on 500 different computers is not permissible. It is permissible to install a subset of components from the CS5.5 edition on any of the computers covered by the license.

Do K-12 School Site Licenses allow home use by teachers?

Yes. Each K-12 School Site License comes with an additional 25 or 50 teacher home-use rights licenses depending on the license purchased. Software used at home by teachers must be used exclusively for teaching purposes related to the teachers' employment with the school (such as lesson planning, classroom preparation, and so on).

Can I install K-12 School Site License software on student computers not owned by the school?

No. K-12 School Site License software can be installed only on school-owned or school-leased computers. Students can purchase education versions of Creative Suite 5.5 software through an Adobe Authorized Education Reseller.

What are the system requirements for each CS5.5 product available through the K-12 School Site License program?

For up-to-date information on system requirements for Adobe Creative Suite 5.5 software, visit www.adobe.com/products/creativesuite/ and navigate to the system requirements pages for each edition.

Can I purchase an Upgrade Plan for K-12 School Site Licenses?

Yes. Adobe offers an Upgrade Plan for all Creative Suite 5.5 K-12 School Site Licenses. Contact your Adobe Authorized Education Reseller for additional information.

Do I have to purchase separate K-12 School Licenses for Mac OS and Windows® applications?

K-12 School Site Licenses allow the use of software on Mac OS and Windows platforms. Customers can install software on both platforms at their school provided the total cumulative installations do not exceed 250 or 500.

Where can I find additional information about the K-12 School Site License?

For more information about the Creative Suite 5.5 K-12 School Site License, visit www.adobe.com/education/products/k12_sitelicense/.
